**MAURO GANDOLFO, PhD**

**CEO  
3Brain AG**

Mauro Gandolfo, Ph.D. in bioengineering, serves as the CEO of 3Brain AG, a high-tech company founded in 2011 in Switzerland. 3Brain is the first company commercialising high-resolution neuro-electronic interfaces and is market leader in the field of in-vitro CMOS-based electrophysiology.

Previously his business management experiences include a position as CEO of SlateART (2002-2008) a company commercializing furniture worldwide and a position as consultant in the ICT field for feasibility studies of start-up projects for small/medium-sized companies.

Mauro is a scientist by training, with a focus in developing advanced analysis techniques to unravel the functional activity of in vitro brain models and a large experience in writing and participating of EU-funded projects. His background comprises a PhD in bioengineering at the University of Genova (Italy) and an experience as Post Doc at the Italian Institute of Technology (Italy).
